

**ARADIUS  
GROUP®**  
WE MAKE PRINT RELEVANT

# OUR FOCUS ON SUSTAINABILITY

## PLAYING OUR PART

In collaboration with our partners, Aradius Group is committed to playing our part in a more sustainable future. From the forests where trees are harvested to make paper, through the various manufacturing and printing processes, to fulfillment and end use, we are actively finding ways to continually reduce our carbon footprint and leave a positive impact on the environment around us.

# WE ARE COMMITTED TO A BRIGHT FUTURE.

## SUSTAINABLE SOLUTIONS

Over the years, we have looked for ways to **remove harmful chemicals** from our print process and **work with the right partners**.

- ✓ Clean, water-based solutions for our press
- ✓ Vegetable-based, biodegradable inks
- ✓ Offer paper from responsibly managed forests

## WE RECYCLE:

EVERY MONTH, WE RECYCLE  
ABOUT...

**80** TONS  
OF  
PAPER!

This practice conserves...

**30,000** gallons of oil  
**1,360** trees &  
**560,000** gallons of water!

The mark of  
responsible forestry

## FSC® CERTIFIED PRINTER

As an FSC® certified printer, we can verify and source paper that was **harvested in a sustainable way**.

*For your next print project, consider using FSC® certified paper to help support responsible sources and proper forestry management.*

## CONTINUOUS IMPROVEMENT

As we look forward in our business initiatives, **sustainability will be at the heart of our future efforts**. As a company, we will:

Partner with  
the community

Use energy efficient  
equipment

Continually  
reduce waste

Educate  
our team

Be leaders in  
sustainable printing

Reduce our  
carbon footprint
